Respected Esteemed Colleague,

This is CA. (Dr.) Adukia Rajkumar Satyanarayan seeking your valuable blessings and support for the Upcoming Central Council Election of the ICAI to be held on 3rd and 4th December 2021.

This is the time now to stand up, unite and make our voice count so that we can build stronger institute that will lead the economic growth of our country and make our profession more valuable.

My mission is to empower each and every Chartered Accountant, every CA Student, bring about radical changes in the policy making, and help India becoming the number one economy in the World.

Because I believe we are worth it!

Leadership is not about the next election, it's about the next generation.

Simon Sinek

"Let's Project the CA profession as a global champion of innovation"

I wish to meet each one of you personally /talk over phone. Pardon me for it couldn't have happened due to Covid-2019.

However I am available 24/7 - 365 days a year / 366 days in a leap year and I have also proven extraordinary performance and merit.

As a first step towards my mission I urge everyone to expand their professional reach and seek new opportunities by going beyond their traditional areas of practice as a leading innovator, Complete Business Advisor (CBA) so

Where the CA profession goes the World follows!

I believe, we all Chartered Accountants whether young professionals or experienced practitioners are at par and contribute in nation building in every stage we are in.

It is indeed a great pleasure to the share with you my thoughts and mission that are directly align to Nation's agenda in becoming the no. 1 economy in the world.

Change is the only constant in life. One's ability to adapt to those changes will determine your success in life

- Benjamin Franklin

This makes so much sense in present life. There was a time before anyone had a personal computer in their home, there was also a time before anyone had internet likewise there was a time before anyone had smart phones. Similarly hundreds years ago barter system was followed for exchange of goods and services in return of goods and service years later come the innovation of physical currency that now slowly changing to E-currency.

Well these transformations are proof that business does undergoes a change. So when such kind of transformations and changes happen the world turns to a chartered accountant and asked what do we do?

Which is why, we Chartered Accountants must keep learning, improving our soft & technical skills and help people achieve their goal through our expertise But the question is how to achieve this?

The golden key is Master mind- Team Work

When two people join their energies together, they gain the power of three people working on a common goal. Napoleon Hill says, "No two minds come together without thereby creating a third, intangible force, which may be likened to the third mind, called the mastermind." It means surrounding yourself with talented people who share your vision, because the alignment of several smart and creative minds is exponentially more powerful than just one

"Master mind is a Coordination of knowledge and effort, in a spirit of harmony, between two or more people, for the attainment of a definite purpose. No individual may have great power without availing himself of the "Master Mind."

~ Napoleon Hill

I feel we can practically move mountains and achieve more than we ever thought just by tapping into the wealth of knowledge and talent within our core team group

"Each one of you is my Mastermind!"

In this fast-changing economic scenario and ever-changing laws of the change, we professionals cannot abstain from changes and remain aloof. We need to embrace these changes gladly with open arms and evolve. Not only the technological advancement and advent of Al and Block chain technology reshape the way we carry out our traditional area of practice like auditing, it will also require effective communication with various stakeholders and active engagement with authority like NFRA to show them the importance of our work.

I see the NFRA Consultation paper dated 29th September 2021 on Statutory Audit and Auditing Standards for MSMCs as an opportunity rather than any threat.

It's time to engage with the stakeholders and emphasize the importance of audit in any size, scale and nature of enterprise.

Dream big

Visualizing the outcome we want is a very effective way of starting to work toward them.

Like what Napoleon Hill said in his classic success book, Think and Grow Rich:

"Whatever the mind can conceive and believe, it can achieve"

Now dreaming does not mean having pie in the sky ideas but what we mean by dreaming is having something that truly inspires you and gives you a reason for living a goal that's worthy efforts and that's going to good for you and the World!

Dreaming is good for the World for the Greatest achievement was at first and for a time a dream!

History is filled with dreamers who change it for the better. The greatest achievement in the history would never have happened if it hadn't been for people who dream.

Let's just say there is a war, a war of uncertainty and we chartered accountant being a soldier in this war leading our troops into battle against uncertainty so every service, opportunities in economic activity you create is leading the society forward one step closer to victory.

As you must aware in our election time the candidate has to speak about past & present achievement and future goal.

With great humbleness at my command I communicate that I along with my team members rewrote the history of WIRC when first elected in 1997 as a Chairman of Western India Regional council.

"What we did in 365 days is more than we done in 50 years!"

We had conducted more than 1000 programs almost on every subjects including Export, Customs, NBFC, Mutual fund, Arbitration, Corporate governance etc. we have motivated more than 10,000 members to author books. There were about 3000 members that were given training as a coordinator.

We did program with all possible stakeholders, and we also did meeting with official of 3 state governments namely Maharashtra, Gujarat, Goa. From conducting international RRC (Residential Refresher Course) for studying progress of America, to meeting with World Bank we have done everything.

All our efforts were made worth it when the region received the best region award!

I have totally new vision for my 7th Term of the Council. With my vast experience of 18 years at council and 6 years at regional council, 40 years in the profession, I will be able to contribute in growth of profession at global level through our alma matter.

In last six years 2016 to 2021 I have devoted lot of time in learning global practices with free mind.

My plan is to portray ICAI as a stronger global no. 1 professional body that will lead and drive the economic growth of our country with the contribution of our professional expertise and knowledge in all kinds of economic activities that further accelerate the growth of nation.

I envision ICAI to be think tank for the nation and world!

- ICAI as a best policy advisory to the present 53 Central Ministries of India
- ICAI as best policy advisor to all 28 States and 8 Union territories of our Country including 750 plus districts and each Taluka.
- 3. The great ICAI greatest in terms of Corporate Governance and leading the increase in the efficiency
- 4. ICAI the best Professional Think Tank in the world
- Proactive working of ICAI with updated strategies and in touch with government initiatives.

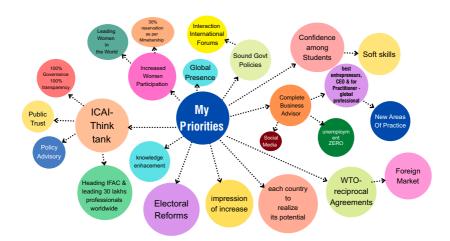

I draw this inspiration from the European Economic Forum founded in 1971 by individual Economist Klaus Schwab that later in 1987 became the World Economic Forum which is committed to improvising the state of world and also that human being has supreme and unbelievable power to achieve whatever that person decides.

I believe that there should be no limit in what we can achieve and it is our time to redirect the socio-economic agenda for ourselves and the successive generations to come.

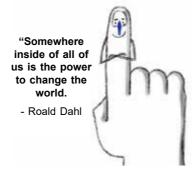

Your representative in the capacity of an effective and transformational leader...!

I humbly seek your vote to allow me to represent you in the capacity of an effective and transformational leader ensuring efficiency at every level of institution's working so that every member and every student will have a voice and can directly benefit from my mission bringing desired change in our profession.

My Election Agenda:

- ICAI Think tank for nation and the world: We will actively work
 for coming with services in all possible economic activities, creating
 opportunities, inventing new areas to make contribution to. Efforts will
 also be made for conducting initiative of global collaborations.
- Ensuring sound policies of Government: With our deep research of governance will assist government in providing sound policies which everyone will adopt and bring reform through the coordination with all central ministries (presently 53 ministries) and 28 States, 8 Union Territories.
- 3. Members in the capacity of Complete Business Advisors: We ensure that the professionals will have value added services and become a complete business advisor by ensuring that the members will go beyond the traditional practices of direct and indirect taxation and auditing.
- Members in Employment will become CEO Chief Executive Officer by mentoring by ICAI with all business skills as leaders

- 5. ICAI to become the Best Educational Institution: Ensure to make ICAI the best educational Institution in comparison to Harvard, Cambridge, Oxford and other leading educational Institute of world etc. that will focus and make sure that every student joining CA must pass exam and become the best human being as I believe
- 6. "EVERY HUMAN BEING HAS IMMENSE CAPABILITIES WE JUST NEED TO HARNESS THEM PROPERLY"
- 7. Focus approach on increasing the number of students and clearing the exam: We will make the system's environment more people-friendly, cooperative in a way so that more students will be attracted for enrolling CA course and make sure that there will be no fear of passing exam.
- 8. Doubling the contribution to achieve desire GDP Goal: Enhancing the efforts in achieving GDP goal of Our Country that is- Making India a 10 trillion US \$ Economy in 2024 only instead of 2034. This can be achieved if we all professionals effortlessly work on all possible economic activities.
- 9. Institution of Public Trust: We will ensure that the people's faith and confidence on our profession as "Institution of public trust" will continue, by regularly associating with government by assisting in schemes and policy decision implementation
- **10. Transparency in disciplinary proceedings:** The only way to achieve this is when we will make the proceedings public like a court hearing
- **11. 100% Transparency** being the sole ingredients of the fair and efficient working of any institution my plan of action will also focus on bringing 100% fair and transparency in working of council agenda and proceedings.
- **12. 100% Governance:** The only way to achieve transparency is to improving Governance at ICAI, Regional Council & Branches and by diligently following the code of conduct.
- 13. Equal focus will be on making sure that every member will be treated on par in government work and panels
- 14. Ensure that more members will be **representative for state councils from each state** irrespective of number of members
- **15.** Indian Firms to become Global Professional Services Firms: To give handholding support to the domestic firms to make it to the level of Global professional services firms. We can start establishing offices first in all 750 districts, then 28 states and 8 union territories. This may later expand in 191 countries in the world.
- **16. Reaching Global Market:** We will encourage the professional to make their services reach the International boundaries

- 17. Increase in the number of membership: We will work in order to ensure that every person who have clear the exam to take membership in the institute
- **18.** Forming Integrated environment in the institute through the principle of Impression of Increase
- ICAI assisting members for developing practice by handholding like some of the Institutes in world UK, USA etc.
- **20.** To ensure that the institute will work with members to design an approach that suits their business needs, a cooperation to develop and enhance their technical and business management expertise and to apply this to achieve goals.
- 21. To engage more and more reciprocity agreements with foreign institute
- 22. To enforce World Trade Organization (WTO) general Agreement on trade in services to explore the Global Market

My diligent focus will be upon the increase in the number of members to the institute. I feel that people will go where they are given increase and the supreme power. Throughout my life I have been preferable to creative mind instead competitive mind. As the mind that seeks for mastery over others is the competitive mind, and the competitive mind is not the creative one. Also in order to master your environment and your destiny, it is not at all necessary that you should rule over your fellows.

Therefore I believe,

Do everything that you do in the firm conviction that you are an advancing personality, and that you are giving advancement to everybody.

- Wallace Wattles

- Author of "Science of Getting Rich" 77 pages book a must read by every member and student

I feel it is extremely difficult to do things time and again the same way and to expect a different result, our hopes and aspirations may not be achieved if we do things the same way.

Therefore, in my career of spanning around four decades I have been vocal about how it is extremely important to explore new areas to use our expertise for the mutual growth of us and society that we live in.

We Human have the greatest gift of "Thinking" given by Almighty!

It is our great fortune that we human are gifted with the greatest art of "thinking". As we possess the ability to become what we think to become,

makes us the sole author of our condition, so make a choice as to what condition you want to live in, once you make a choice all you have to do is "start".

I once come across a motivational extract from book authored by Robin Sharma that is,

"Things happen twice, first in mind then in reality",

And, it has been source of inspiration since then.

Mere thinking is not enough. As for a miraculous change it is important that you must "Think BIG".

What can be a BIG thinking then, for me it is envisioning and expanding our potential.

So what is our Potential as a professional and contributor to economic building of our Nation?

I believe every chartered accountant can bring miraculous result in assisting all levels of economic activities. There are six crores plus businesses/ enterprises (in the nature of micro, small or medium enterprise some of which may be startups etc) running in our country so the 50% that are practicing professionals out of total 3 lakhs have opportunities to assist and guide at least four hundred of such enterprises.

See, No matter what capacity you want to serve society whether as

- An economic growth contributor,
- An improver of the system,
- A mentor etc.

It is important that you possess strong burning desire for the same, remember there is a difference between a desire and wish as the former is an active process because you know that whatever you desire is attainable whereas the latter is mere wanting or longing for something.

So, make a choice and decide how much do you really want that?

Do you want that enough to be willing to turn that from a want to burning desire because if it's burning desire?

"Then things are going to change, you are going to change, first it's going to happen inside you and then it's going to begin to happen outside world"

Detailed priorities are as further

I. For Students:

 Realizing the potential and become a constant learner: To unlock your potential by

inculcating habit of learning and transforming that learning into an advantage

 Mentoring the young minds: To mentor each student in the capacity of an effective and transformational leader to encourage for acquiring new knowledge, staying on determined path, focus on it as I strongly believe that there is

Genius in each one of us!

- Reducing the pressure of exam: I will work toward making the system of conduct of exam more cooperative and friendly for the upcoming students, and generating confidence in them that everything possible if you approach that way.
- Emphasis on Improving Soft Skills: While our technical skills
 will get us the role we want in our life, it is our soft skill that will
 help us to create impact upon other. I will put relevant focus
 upon enhancement of soft skills among the students and young
 minds.

II. For CA professionals

 Making best possible use of Social Media to share pure knowledge and become Global Professional-

Out of 7 billion Population of the world total 4.5 billion people uses social media, which makes it the most desired place to connect with the world. It is true that we professionals are required to obey code of conduct, ethical standards but remember there are no such restriction on sharing pure knowledge as a global expert without soliciting, securing and advertising the prospective client in any manner and it is not prohibited in any code of conduct.

- Impression of Increase: All professional to provide there service with the impression of increase, that is to say treating everybody the same you want for yourself. To inculcate the habit I urge everyone to read the 1910's masterpiece "The Science of Getting Rich by Wallace Wattles". Whether you are in the capacity of an entrepreneur, in job or providing services, you must leave people that you have encounter with impression of increase.
- Find new areas of practice and challenge yourself in the next role: In order to promote the career growth of budding as well as experienced professional I encourage to explore new are of practice every time, there are more than 500 services where professional can grow. Challenging our expertise will only open new doors of opportunity for ongoing learning. Remember the only limiting factor is our thought.

- Be an agent of Change: Professionals are the key drivers of change and evolution in the profession, the effort must be made in that way to explore Making efforts for professionals to become key drivers of change and evolution in the profession.
- Enlarging the reach of services: Inspiring each and every professional to expand their services reach seek new opportunities by going beyond their traditional areas of practice, also to ignite spark to take their professional service to the global level and growing in every possible way.
 - This way to help them become best professionals in the world!
- Contributing to the ease of doing business: making an
 effort to encourage everyone to use their expert technical and
 procedural knowledge that will add up to the ease of doing
 business by mentoring or guiding the budding entrepreneurs,
 professionals, individuals making them as job giver rather job
 seeker and ultimately building strong economy.
- Reinvention of expertise through social media use: Making best possible use of social media to reinvent the expertise and sharing pure knowledge and see it will benefit to the society.
- Become best entrepreneurs, CEO (if in employment)
 and global professional: since the professionals can be
 largely divided in three major groups that is A. Entrepreneurs
 B. in Employment and C. in practice efforts can be made
 for mentoring members best entrepreneurs, each person in
 employment CEO & each member in practice as best global
 practitioner.

III. For ICAI:

- Improved Governance: To Improve the governance at ICAI and making it No. 1 and exemplary at global level
- Leading institute in terms of Corporate Governance: To make the great ICAI greatest in the terms of corporate governance and leading the increase in the efficiency
- To make the institute professional think tank in the world
- To **enhance the pro activeness** by constantly updating with strategies and keeping in touch with government initiatives.
- To ensure ICAI be leader for chartered accountancy profession in world and in all organizations of Chartered Accountants including IFAC www.ifac.org which is global institute representing the profession comprises of 185 member institute from 130 countries, and 30 lakhs accountants across world by heading IFAC at least once in 5 years and be very active in all global policy making and global forums including world bank, international finance corporation

IV. For State Government:

- Bringing prosperity, efficiency, and cooperative environment:
 To assist the State governments in terms of bringing prosperity and Making efforts for maximizing cordial relation between business and governments
- Increase the presence of ICAI: Assisting every economic activity in complying with the mandates of respective state government. Each district and taluka becomes growth centre by having ICAI presence through its members

V. For Nation:

- Contribution in policy reforms: Coming up with sound policy initiatives adoptable by all and assist the present 53 ministries at the central level and all 28 states and 8 Union territories
- Improvising the ease of doing business through service of Chartered Accountants

VI. For Planet & World:

 Make efforts for each country to realize its potential through global and regional forums, IFAC

VII. Electoral Reforms

We have experienced 15 years of expanded Council with each term of 3 years and maximum number of terms 3. I have seen both scenario and majority of council members feel that earlier system was good.

President be selected on the basis all India voting and debate and discussion with members.

ICAI spend substantial amount in election process besides each candidate putting the time and money. We may have tenure of 5 years with checks and balances of inactive member lapsing membership of council

Constituencies should be reorganized so that female members who are 30% of membership get proper representation – geographical sublimit can be there to have representative from major geographical area. It will help to have views of all members.

VIII. Interaction with Other Regulators, Govt., Ministries, International Forums, regional trade bodies

We should respect all regulators and ministries and convert our obstacles into opportunities. All global forums IOSCO, IAIS, UNEP, UN, World Bank.

My thoughts on NFRA Consultation paper dated 29th September 2021, on Statutory Audit and Auditing Standards for Micro, Small and Medium Companies

The importance of Audit of an organization is perhaps as same as what is oxygen for human being. It is a 360 degree \review of all the organization working and to speculate whether the organization can expand or if there is some cost cutting to do. Therefore, I view the consultation paper as a chance to relook at our services, to enhance the quality and benefit of our services to stakeholder and overall society.

My detailed response can be accessed at https://cadrrajkumaradukia.com/resource/Image/Consultationpaper issuedbyNFRAandImportanceofAudit.pdf and the same is also available on my website www.cadrrajkumaradukia.com

IX. Chartered Accountant the frontline warriors to make unemployment zero!

Out of total 1.38 billion population about 65% belongs to the age between 15 to 65 age which is age of working population. In our attempt to make unemployment zero will assist small businesses to creates jobs

X. Making exhaustive use of Technology

We without settling where our profession is today, must diversify and prepare the generations to go beyond traditional professional practices, become beyond what they think they can do, dream big, think big and ultimately make the world a better place.

There are about 5 billion of people that uses social media this amounts for 70% of world's population, this data gives a lot scope to connect with others.

We shall make maximum use of technologies and social media, we are already heavily reliant on the technologies and the younger generation is by default growing in the world surrounded by innovation, we can definitely use this advantage to reinvent our expertise.

Let us be key driver of change to make the world a better place to live!

XI. Participation of women members

It is no doubt that female professionals are giving tough competition to their male counterparts in the accounting filed. Presently about 30% professional consist of women chartered accountant, who deserve 30% reservation in the institute in policy making at council , Regional Council and branches in order to have proper representation .

It is our responsibility to make sure the institute is committed to egalitarian environment.

My priorities will also include creating opportunities of services where female professional can excel for instance:

- a. Coaching in universities and private institutions.
- b. Professional role at the top management of business like CFO, CEO, Vice president etc.
- c. Taking consulting assignments

We need to conduct special programs to cater their needs taking into consideration the work life balance as it is more critical for women as compare to men.

Women are creating the future of Finance. I will work in the role of mentor to encourage more and more female CAs to make it to the list of leading women in the world, so that they can be an example for the women who step back from pursuing their passion.

XII. Encouragement for Student to enroll for exam: We see decrease in the number of candidate clearing the examination to be qualified CA. A serious focus should be given to it. Let us simplify the method by first removing the fear of exam from the minds of students.. The system shall be made people-friendly

XIII. Soft skills training

We will put emphasis on imparting soft skills to enhance employability.

- XIV. My focus will be also be on making sure that every CA in employment should become CEO
- XV. Professional to become Global Practitioner: We will be working on making the domestic firms to be Global Professional Services Firms and be international market organizations offering professional and quasi-professional services to a wide range of clients across an equally wide range of economic sectors and geographic regions.
- **XVI.** Emphasize on optimum utilization of Human resources: Human resource being the valuable resources can be turn into diamond resource and the Chartered Accountant can be at a centre point.
- XVII. Encourage to provide assistance in incorporation of business: It is a myth that business can be started with money and only money as even one laptop and free social media that is used by 5 billion people is enough at the initial level & can be smart way to explore business world

XVIII. The future of CA Profession

The future of CA profession will remain on this planet till human life and business is on this planet. We provide 360 degree approach to an enterprise covering each function of the enterprise. Number of areas where we can provide services are more than 200 many of them I have covered them on my YouTube channel. My you tube channel can be access at https://www.youtube.com/c/CADrRajkumarAdukia. Please like and subscribe and share the videos among our professional fraternity.

As the channel is dedicated to the CA fraternity I am only listing out few of the services.

I also make daily podcast https://anchor.fm/cadrrajkumaradukiasuggesting new professional opportunities where the Chartered Accountant can explore. Apart from this I also have website https://cadrrajkumaradukia.com/dedicated for our profession providing all of us with detailed knowledge of each economic activities.

"Social media have made possible and easier to discuss, network and share valuable information and updates with the community. You can connect with my social media platforms by visiting https://taxguru.in/tag/rajkumarsadukia/ where I put daily article advocating the agenda of expanding of our professional reach and other social profiles through

https://www.linkedin.com/in/dr-rajkumar-adukia/;

https://www.facebook.com/rajkumar.adukia;

https://twitter.com/CADrRajkumar;

https://www.instagram.com/cadrrajkumaradukia etc."

It is our responsibility as professionals to be drivers for change and evolution in our profession.

I encourage all my professional colleagues to make maximum use of online platforms / social media in order to reach our services to the society. It is a myth that we are prevented due to code of conduct, ethical standards but remember there are no such restriction on pure sharing of knowledge as a global expert without soliciting, securing, and advertising the prospective client in any manner and it is not prohibited in any code of conduct.

So unless you are

- Soliciting clients or professional work directly/indirectly by circular, advertisement, personal communication or interview
- Securing service of person who is not employee of such Chartered Accountant or his partner or by means which are not open to a chartered accountant, professional business
- Advertising professional attainments/services, or using any designation or expression other than Chartered Accountant on professional document, visiting cards, letter head, signing board, unless it be university degree or title accepted recognized by ICAI

There are no such restrictions on sharing your valuable knowledge to the society.

Knowledge may be a power but it's much more powerful when it is shared!

Hence yet again we impressed upon the thought that if we know something we should aggressively share our knowledge.

Professional areas where Chartered Accountants can provide excellent expertise are

- 1. Human resources management, employment law compliance etc.
 The full package guide providing compliance and advisory service,
 HRM services, Soft skill enhancement, making the organization
 statutory compliant, and to make the dynamic businesses to grow.
- Assistance to Agri-Entrepreneurs Assistance to the budding Agri Entrepreneur, Agri-tech Startups in terms of guiding through compliance procedure, financial management and strategies, attracting investors with well business plan, so that they can freely focus upon the core business planning.
- 3. To be corporate governance professionals
- 4. **Professional Guide to Startups and MSMEs** by making best use of their technical, procedural, financial and management expertise.
- Representation before Tribunals: Advisory, consulting, representation, drafting, discussion etc services under tribunals for instance matters before the ATFP, ITAT, NCLT & NCLAT, GST Appellate tribunal etc.
- 6. Real estate sector
 - RERA provides opportunity to CA's to certify withdrawal of money from Escrow account for the project.
 - CA's can represent before Real Estate Regulatory Authorities, Appellate Authorities and Adjudicating Officers under RERA.
 - The professionals can leverage their knowledge in providing full package services in terms of consultancy, compliance, representation, due diligence, document vetting, drafting, approval draft, project execution, investment plans, deal advisory etc. which in turn accelerate the real estate sector's development and consequently add to the nation's economy.
- 7. **Opportunities in ever evolving permanent Cyber world:** Data protection specialist
- 8. **Cooperative world:** assistance to cooperatives right from inception to middle level management.
- 9. Opportunities in ADR world as Dispute resolution provider: a certified accredited dispute resolution provider either in the category of Mediator, Conciliator or Arbitrator after successful completion of training course. Drafting of Arbitration Agreement, Representation of parties to the dispute, Assistance in drafting arbitral award, Assisting in preparing submission to arbitrator, Member of arbitral tribunal, Assisting trade and industry associations in setting up ADR mechanism, Arbitration agreement in light with arbitration rules promulgated by various international institution, Arbitrator for international commercial disputes, Determining the procedural law to be applied, Drafting commercial trade agreement in consonance with ADR principles etc.

- 10. Virtual Marketing Director to make best use of their expertise to help business/organization in achieving exponential growth. Marketing, increasing the sale of business is one such area where the assistance of chartered accountant may be crucial for businesses. Assist organization/entities in building better and sustainable business
- 11. Assistance in Merger, Demerger & Acquisitions to business: CAs can impart professional services in the capacity of merger and acquisition consultant by a thorough understanding of financial model, present and future cash flow; legalities involved in Merger and Acquisition; knowledge of exchange rates, norm of accounting in case of international mergers; eventual merger knowledge, stock exchange rules in case of acquiring public companies etc.
- 12. Professional expertise under Climate Change Mitigation
 - o Conceptualizing the Clean Development Mechanism (CDM) project
 - o Quantification of greenhouse gases (GHG) Carbon Footprint
 - o Selection of Cleaner technologies for New projects
 - o Project risk analysis
 - o Registration of project both national and international level
 - o Obtaining Host country approval
 - o Preparation of Project Concept Note
 - o Preparation of Project Design Document
 - o Selection of Methodologies and Baseline
 - o Legal and regulatory advice during negotiations with host country Designated National Authority (DNA)
 - o Advice on the appointment of independent validators

We are in the new phase of adaptability. Our services to client have undergone changes so much so that we have come far more than just sticking around to traditional areas of practice. The economic dynamism has expanded the areas, field, industry within which we can provide our expertise, services and assistance.

I believe that as professionals, our voice is to serve as many people in the society as possible. On this note I urge everyone to come, share knowledge & expertise for the benefit of society at large as we do have the capacity to shape the future for ourselves and the nations.

Come on, stand up and be vocal about what you have to offer!

God has created every one of us with unique gift, and has gifted some with leadership abilities to help guide a set of organization. I feel council needs more senior members having vast experience and diverse knowledge to actively suggest policies to all 53 central ministries. We need representation that drive much needed revolutionary change contributing to expansion of our profession and furthering the nation's development.

I have volunteered to bring such revolutionary changes in our profession by contesting the upcoming Central Council Election of the ICAI to be held on 3rd and 4th December 2021.

Don't Just Vote, Mark your Preferences!

I humbly folded hand pray for your first / best preference vote to see miracle happening at national level. The preferential voting system followed by the institute is the best the most acceptable system, though there is single preferential vote you have right to elect 11 members therefore give as many preference as you can.

MY PASSION – EACH MEMBER attains sky height and I would like to be partner in the process by using all my knowledge, experience and expertise that I have gained in the past four decades and in the process each one will be benefited.

At this juncture putting by brief details as an Aspiring Candidate for central council (ICAI-Western Region) Election 2021

Candidate for Central Council Election (ICAI-Western Region) 2021 requesting your

FIRST/BEST preference vote to

"Ballot Serial No. 1"
